Founder of a digital business generating ₱1M+ in revenue, with experience in client management, analytics, negotiation, and execution.

WORK EXPERIENCE

Founder & Growth Strategist

Manila, Metro Manila

Self-Employed

Jan 2023 - Present

- Founded and scaled a digital products business to ₱1M+ in revenue within 18 months by developing and applying data-driven growth strategies.
- Analyzed social media performance across multiple accounts and used engagement and reach insights to grow the combined audience to 500K+ followers and improve content performance.
- Managed 30+ local and international brand partnerships by negotiating pricing, coordinating contracts and campaign deliverables, and maintaining client relationships to successfully execute collaborations.

PROJECTS

BalikBayan | Reintegration Decision Support Platform

Jun 2026 - Present

Project Manager & UI/UX Lead | Capstone Project

- Led a 4-member development team, managing sprints, task assignments, progress, deadlines, and issues.
- Conducted stakeholder interviews and design reviews with OWWA's Planning and Program Development Division to gather requirements and validate system workflows.
- Translated stakeholder requirements into project scope, user stories, use cases, and prioritized features.
- Designed the platform's information architecture, user flows, wireframes, and Figma prototypes based on stakeholder feedback.

RMTY Designs Centralized Communication Platform

Aug 2025 - May 2026

Project Manager & Product Designer | Software Engineering

- Coordinated an 8-member team by translating client requirements into system features and project milestones.
- Developed backend communication functionality and integrated an SMS API for automated messaging.
- Worked with stakeholders to review feedback and refine system workflows and features.
- Designed user flows and high-fidelity Figma prototypes based on client requirements.

4 Siblings Motorcycle Service Operations System

Aug 2026-Sept 2026

Project Manager | Business Analysis & Solution Design | Client-Based

- Interviewed the client to identify operational challenges, current workflows, and system requirements.
- Developed the project charter defining the project scope, objectives, stakeholders, budget, and deliverables.
- Analyzed current business processes and translated requirements into system features, data requirements, and workflows.
- Led the proposed solution design covering the data platform, BI dashboards, system architecture, and stakeholder validation
